Sigmund Freud

Psychoanalysis

Moral Development
Sigmund Freud
The Id

• Immediate gratification
• No thinking or reasoning

Example: A baby cries until he gets what he needs.
The Id
The Ego

- Logic and controlled behaviors
- Can reason with themselves
- Can be reasoned with

Example: having to think about the consequences of cheating on a test to make a decision
The Ego
The Superego

- A person’s moral code
- The conscience
- Right and wrong is already established-automatic (no thought involved)
The Superego
Freud’s Theory of Moral Development
